

CERT REPRESENTATIVE

- Each association President was asked to assign a person to represent their building in emergency situations. With 2 sq. miles to cover, it is imperative that we have assistance in getting you the help needed in a timely manner...
- The CERT reps name and phone number is to be included on the Officers and Delegates form, a *Cert Representative line has been added to the form.*
- The name and number should be posted on each Association Bulletin Board so the residents know who to contact to for help and to report building damage.
- All residents should be aware of this effort and participate by assisting their building Rep in gathering this information.
- **WE NEED TO KNOW WHAT HELP YOU NEED FOR CERT TO GET HELP TO YOU.**
- CERT needs all association to make a report for a "Damage Assessment Report" for Palm Beach County Emergency Management Services. even where no damage or injuries have occurred).

For severe medical emergency, **call 911 first**, then report to CERT with that information also.

For those who report building damage that have their Associations insured with Legacy, their information will be relayed to an insurance representative, which will be here to expedite recovery. As part of their service, the insurance company will have a construction company contracted to start work immediately in the event of an emergency recovery effort.

If phone service isn't available, Cert will dispatch teams to relay information to CERT Command center (UCO office) ASAP. Or if you are able, make you way to the UCO office to make the report, or send someone who is capable with the completed "After the Storm Recovery" form

CERT REPRESENTATIVE

Before the storm

1. Count all residents, which units they are staying for the storm.
2. Discourage residents from staying alone during the storm.
3. Encourage all residents to stay on the ground floor if possible.
4. Inquire about flashlights and water.
5. Survey property to be sure possible flying objects, recycle containers stored, etc. have been secured.

After the storm

1. Check on residents make sure they are okay
2. Severe emergencies, heart attack, etc, call 911 immediately
3. Survey building for damage, broken windows , roof blown off, etc
4. Notice flooding , trees down, or other hazards on roadways
5. Make report to CERT **call 561-683-9189** Call even if everything is O.K.

Hurricane preparation and recovery

Purpose is to educate and inform all the residents,(especially newcomers to Florida) of the procedures before and after a hurricane.

Weather information and lead time for hurricane arrival—Cone etc.

early warnings to make contacts for shelter-- transportation , medical needs. plans for evacuation (leave town)-to a center.

Emergency operations coordinated by EOC. ICS -briefly how it works -

Setting up of EOAs--VRC, etc, relationships vital to recovery, how Century Village fits in the picture, and how important the immediate reporting of our rapid assessment after the storm.

CV CERTs part in this operation--small cog in a large wheel, but vital in making it work.. Importance of each of our roles in quick response time after hurricane passes. Checking on neighbors, checking buildings for damage, checking for clear roadways for rescue if necessary.

Reporting findings using After storm recovery form info and calling in ASAP .

The quicker our report is received at the EOC the sooner plans can be developed in overall planning and needed aid can be dispatched.

While all this info is important, the main theme we want to convey to our residents is that by helping ourselves and each other, we also help by not exhausting outside resources that aid in the overall recovery of the area
